

CLAIMS

1. A method for monitoring a currency--chip transaction at a gambling table in a casino, including the steps of
 - (a) determining with at least one sensor the value of chips dispensed to a casino patron;
 - (b) determining with at least one sensor the value of currency presented by the casino patron in payment of the chips; and,
 - (c) comparing the value of the chips dispensed with the value of the currency presented to the casino patron.
